SUMMARY

Detail-oriented QA Engineer with over 7 years of hands-on experience testing complex, highly integrated digital platforms across web, mobile, and back-end systems. Skilled in API, functional, and data validation testing, with a proven ability to design and execute comprehensive test strategies for both manual and automated testing. Demonstrated success leading QA efforts within cross-functional teams, consistently delivering high-quality software under tight deadlines. Experienced in Agile/Scrum environments and CI/CD pipelines.

CORE SKILLS

Testing & QA	Manual Testing, Automated Testing, API Testing, Functional Testing, Data Validation, BDD, Test Planning, AI-Assisted Test Gen, AIDLC, TEM
Tools	Selenium WebDriver, Appium, Postman, Charles Proxy, JIRA, Azure DevOps, Xcode, Contentful, AWS S3, DynamoDB, Power BI, GitHub, Bitbucket
Languages	Python (OOP), SQL, Oracle, MySQL, PowerShell
Performance	Apache JMeter, Load Testing, Datadog, Splunk
CI/CD & DevOps	Git, Azure DevOps, CI/CD Pipelines, Peer Code Review
Leadership	QA Lead, Mentoring, Agile/Scrum, Risk Management, Stakeholder Comms

EXPERIENCE

Lululemon Athletica

May 2022 – Present

[QA Engineer \(Contract\)](#) · Vancouver, BC

- Delivered end-to-end QA across multiple projects on iOS and web platforms, covering front-end and back-end systems
- Acted as QA lead on various feature teams — owned task allocation, test planning, coordination, and sign-off
- Developed and enhanced an internal automated testing framework to improve regression efficiency and maintainability
- Supported implementation of an AI-powered testing tool that automates test case generation by ingesting Jira tickets
- Managed test environments (TEM) across multiple projects; collaborated in Git-based workflows with peer code review
- Reported to senior management on test coverage, automation progress, and key performance metrics

RISE – Product Catalog Migration (PCM4 to PCM5)

- Performing data validation for a global product catalog migration, ensuring product data accuracy across schema and structural changes between PCM4 and PCM5
- Validating data ordering, sorting, formatting, and transformation logic to confirm data is flowing as expected into the new system
- Writing and executing SQL queries to compare records and investigate data discrepancies between source and target systems
- Supporting consolidation of region-specific catalogs (North America, Europe, Australia) into a single unified global catalog

Next Gen E-commerce (NGC) – Web & iOS

- Replaced legacy systems with modern microservices for Cart, Shipping, and Payments
- Defined and executed comprehensive master test plans across platforms
- Performed integration and API testing using Postman; deployed regression suites within CI/CD pipelines via Azure DevOps
- Supported A/B testing initiatives to inform go/no-go decisions

Estimated Delivery Date (EDD)

- Validated end-to-end EDD feature ensuring accurate delivery date calculation across web and iOS
- Tested Order-By / Get-By logic for cutoff time handling, timezone accuracy, and edge cases across shipping methods
- Performed API testing with Postman; executed regression and integration testing to protect existing Cart/Checkout flows

Apple Wallet Order Tracking – Narvar Pilot

- Integrated Lululemon app with Apple Wallet and Narvar for real-time order tracking
- Used Postman for API validation and Splunk for engagement monitoring
- Owned QA planning and cross-functional communication between vendor and internal teams

UI Redesign & Other Projects

- Conducted detailed UI and functional testing for redesigned components including error states, checkout, and bag experience
- Gift Card (Givex): Tested payment method integration; validated data transformations between payment systems
- Inventory Management System (DIS): Validated system migration and inventory syncing

Tools: Selenium WebDriver (Python), Postman, Xcode, Charles Proxy, SQL, DynamoDB, TestRail, Jira, Azure DevOps, Confluence, AWS, Git/Bitbucket, AI test case generation tool

Accedo.tv

Aug 2021 – May 2022

[QA Analyst \(Contract\) · Toronto, ON](#)

- Led QA for the Peloton OTT application on iOS and tvOS platforms
- Designed master test plans; executed API testing using Postman and network debugging with Charles Proxy
- Validated back-end data using SQL; monitored app performance via Datadog and Splunk dashboards
- Provided L2 incident triage and collaborated with L3 and service management teams
- Liaised with client stakeholders to align QA strategy and delivery timelines

You.i Labs

Apr 2016 – Feb 2020

[QA Analyst · Ottawa, ON](#)

- Led testing of cross-platform OTT applications for major clients across iOS, Android, PS4/5, Xbox, Roku, Samsung, LG, and Nintendo
- Executed test cycles covering DRM, video playback, and user sessions using Charles Proxy, Mongo Compass, and Xcode
- Developed and maintained Selenium WebDriver-based automation scripts; contributed to framework design
- Conducted performance and load testing using Apache JMeter to evaluate back-end stability under varying traffic loads
- Mentored new hires, developed onboarding guides, and standardized internal QA processes

Tata Consultancy Services (TCS)

Mar 2013 – Dec 2015

[System Analyst · Pune, India](#)

- Delivered the BSNL-CDR project using SAP CRM, ensuring high data integrity across 13 integrated modules
- Administered EAI systems and messaging databases processing over 5 million transactions daily
- Provided production support and maintained failover system readiness for critical services
- Performed data transformation validation and ensured end-to-end data flow accuracy across integrated modules

EDUCATION & CERTIFICATIONS

Certified Product Owner

Aug 2020

Bachelor of Engineering – CSVTU, India

2008 – 2012
